

DDBS LEARNING

The Distance, Demonstration-Based
Skill Learning Method

Newsletter 2

IO1

The DDBS-Learning curriculum for vet providers.

IO2

HANBOOK for adult educators and "train the trainers"

IO3

The DDBS-Learning online platform.

The project

DDBS-Learning is a project that embraces the Distant Demonstration Based Skill Learning method into the adult learning world. The project introduces a method for efficient and accountable Distant Demonstration Learning by arranging observation and feedback devices in a way to observe and reflect on the skills' characteristics and information the DDBSL method allows for distant delivery of practical skills.

Beneficiaries and users

Adult educators and staff of education institutions are the direct beneficiaries of the project.

Second partners meeting in Cyprus

The second meeting of the project was held in the Cypriot city of Nicosia, hosted by our partners Emphasys Centre who showed the consortium the STEAM lab in their facilities. During this face-to-face meeting, the progress of the curriculum development (IO1) as well as the training contents were discussed. Partners also agreed on the following steps for the development of the handbook (IO2) and the piloting process of IO1.

In addition, Emphasys organised a visit to OMODOS, a traditional village, and the partners were able to taste the wine produced in the area during a wine tasting.

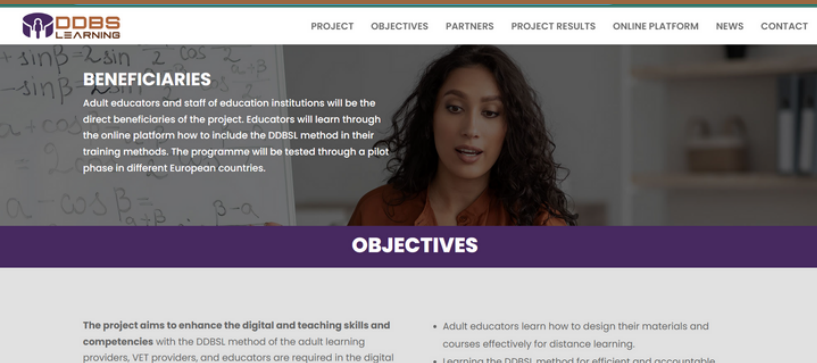

The meeting was an opportunity to learn more about the DDBSL method from the coordinators, GSI, through video demonstrations of their own experience in the world of welding, and to learn more about Cypriot architecture, gastronomy, history and culture.

Launch of the website

The project website has been launched. Here you will find all the information about DDBSL, who we are, the objectives of the project, what is the methodology of demonstrating practical skills at a distance and what goals and challenges we have set for the duration of the project. In addition, through the website you will be able to access the online educational platform where courses will soon be available for adult educators to improve their skills and knowledge about distance education.

Visit our website at <http://ddbsl-project.eu> and keep up to date with the evolution of the project and all the training content we have to offer you!

DDBS-Learning Curriculum

Led by DIMITRA, our expert partners in the development of educational curricula for adult education, all partners have worked on the development of units and contents of the DDBS-Learning Curriculum. It consists of five modules:

1. Skills / characteristics of an adult educator providing online courses
2. Teaching methods and techniques for distance learning
3. Digital tools of distance learning
4. DDBSL method
5. Methodology for designing online teaching and learning activities, courses, and assessment for practical skills using the DDBS method

Next steps

The partners will continue to work on the Handbook as well as on the design and implementation of the platform where the training contents of the curriculum will be available for learning and implementing the DDBSL method by practical subject educators. The pilot phase of the curriculum is also being planned.
